About Us

South West Association of Training Providers Ltd (Swatpro) was formed in 2011 as a partnership of employers and training providers. They continue to provide an effective, not-for-profit, efficient and cost-effective training provider partnership that supports employers and learners across the South West.

The partnership is managed by a Board, chaired by Swatpro's Chief Executive Officer. The Board includes managers from Swatpro's partners. A non-executive director offers the board advice and direction about possible future developments in training.

The company has a unique pedigree as a not-for-profit company that is limited by guarantee. It's membership of established providers, that are approved on the Education and Skills Funding Agency's Apprenticeship Provider and Assessment Register (APAR), have a history of delivering high quality learning and skills.

Foreword from the CEO of Swatpro
Rod Davis

Welcome to the BEMA Member Directory

We're delighted to welcome you to the British Engineering Manufacturers' Association community. As part of the South West's largest engineering network, you're now connected to a wealth of industry expertise, collaboration opportunities, and support. Whether you're seeking partnerships, apprenticeships, or professional development, BEMA is here to help your business thrive. We look forward to growing together.

Charman of BEMA – Bryan Young

About BEMA

Founded in 1936, the British Engineering Manufacturers' Association (BEMA) exists to support and unite engineering companies through collaboration and shared expertise. Originally established as the Bristol Engineering Manufacturers Association, BEMA has grown into the largest engineering trade association in the South-West of England, with members spanning from Worcestershire to Cornwall, and into South Wales and Surrey. Despite its expansion, BEMA remains committed to its founding ethos of mutual assistance. To address the industry's skills gap, BEMA established a dedicated training college to help members recruit and develop apprentices into qualified engineers. The Association began with just 12 founding companies and operated from a modest box room in Filton Avenue. Today, BEMA continues to champion engineering excellence and workforce development across the region.

McBRAIDA

AEROSPACE ENGINEERS

McBraid is a manufacturer of precision-machined components of various size and complexity to the industries that demand the highest quality products. We take advantage of our turning, milling, EDM and grinding expertise to give our customers the optimum combination of cost, quality and speed of delivery.

With our original UK-based factory in Bristol and recently-built Poland-based state-of-the-art factory in Rzeszow (both with AS/EN 9100 and NADCAP approvals) we have the ultimate flexibility when it comes to capability, pricing and capacity.

We are a High Street Insurance broker providing insurance solutions to both individuals and businesses.

We operate out of a sixteenth century shop on Overton's busy High Street from where we also provide a range of other business and community services. The team has been together since 2012, but have a history in the insurance industry going back to the 1980's.

Our key features

Our insurance industry knowledge – we can build products and suites of products specifically to meet our clients' needs

Our attention to detail – we take the time to understand your needs and to match those with the right insurances

Our personal service – no call-centre, just good objective advice!

A.H.DODD & C^o **(ENGINEERS) LTD**

The family owned company was originally started in London by Mr Albert H Dodd and moved to Box in 1962.

In 2004 the company was taken over by Mr Colin Bush who had worked for A H Dodd for 19 years. Colin is now the Sole Owner and Managing Director of the company. The company currently employs 14 highly skilled and experienced staff ensuring our work is of a high quality both for accuracy and finish. Since October 2011, this approach to our work was rewarded with the ISO 9001 certification.

We currently specialise in automatic turned parts, mainly up to 2 ½" diameters from steel, brass, aluminium or nylon with full second operation facilities. We can also machine up to 8" diameter Billets. We offer small to high volume batches of work as requested by our customers.

An inspection department is in operation, providing final inspection reports and certificates of conformity to customers individual requirements.

We won't make a meal out of routine tax and accounting compliance requirements. We will deal with your annual and management accounts with the minimum of fuss, focussing on how our knowledge of your business can add value. We are able to help you develop your plans and deal with any financial issues.

Our main purpose when Corrigan was set up in 2009 as a firm of accountants was to offer our clients a first-class service. More than a decade on, that's still our principal intention.

DCE Holne Ltd was established in 1979 by Mr Reg Chapman. In 1991, control was taken by Mr. Peter Chapman (Managing Director), Mr. Robin Smith (Works Director) and Mr Steve Shaw (Technical Director).

The company has continuously grown with the demand for its services, backed by a highly skilled workforce and experienced management team. Located in the small Devonshire town of Buckfastleigh, within easy access to the A38 (The Devon Expressway) and the M5 motorway. In its extensive factory facilities, DCE Holne specialises in producing high precision machinery components, mainly for use in the aerospace, defence, medical and telecommunication industries, providing a service to customers in the UK and throughout Europe. A high level of expertise has been developed in the machining of exotic alloys such as Kovar, Titanium, Mumetal, Super Invar, etc. Continuous investment into the latest technology has resulted in an unmanned capability with in-cycle probing, providing quality assurance.

Our Courses

Whilst our main provision focuses on supporting employers and employees through apprenticeships, we can also offer full cost vocational training, qualifications through adult learner loans (particularly in the health and social care sector), and skills bootcamps (in Somerset).

We also support the health and social care sector with training via our e-Cert learning platform, which contains courses that are directly relevant to adult care. Employers purchase tokens, which can then be used by staff to access the training - contact us to find out more. It's a very cost-effective solution and we find that employers use the platform consistently, in order to meet their needs.

Our main learning platform is called Clicks2Learn. There are potentially hundreds of courses on here for learners, covering everything from safeguarding to mental health, presentation skills to healthy eating... the list goes on! These courses are freely available to all our learners, whether they are undertaking training with Swatpro or one of the partners.

Why not check out our apprenticeship offering?

TUVUK

Formed in 1979, TÜV UK Ltd carved a niche in the British Industry by dealing with the growing demands for increased quality, safety, reliability and efficiency. TÜV UK is recognised and respected worldwide for its numerous inspection and certification services.

TÜV UK Ltd is member of the following organisations:

- Safety assessment Federation (SAFed) and active in almost all its committees
- European Confederation of Control, Inspection and Prevention Organisations (CEOC)
- British Engineering Manufacturers Association (BEMA)

We were accredited for Certification of Quality Management Systems in 1995. The department implemented a targeted and success-orientated mannered system to face the requirements of UKAS to provide public confidence in the marketplace.

Our qualified experts who operate throughout the entire country are supported by the main office in Southeast London. Additionally, the company can seek support and rely on the technical laboratories and research facilities of its Head Office TÜV Nord in Germany. The head office in Germany offers its services in more than 70 countries and employs over 14,000 people. TÜV UK Ltd operates within a worldwide network and is involved with several international projects in Republic of Ireland, Italy, China, India and the Middle East.

Cyril Minns
ENGINEERING

Cyril Minns Engineering is a privately owned company based in Bristol carrying out subcontract machining of components, but specialising in the manufacture of jigs, tooling and prototypes to either customer or company design, This service is carried out for a variety of applications and industries.

In April 1989, Mr. Cyril Minns sold his company, and the name Cyril Minns Engineering Ltd. was adopted by the new owners. In the latter part of 1991, the company decided to introduce quality assurance and seek approval by a recognised independent authority to BS EN ISO 9001:2000. In 2007, we decided to further our approvals, we have now gained AS9100.

POWER-SPRAYS

Established in 1962, Power-Sprays Ltd. has been a pioneer in the manufacturing of specialist equipment for the mixing, pumping, and spraying of cementitious composites.

Our journey began with the development of equipment for the spray application of decorative coatings, veneer plasters, and fire protection coatings. As the industry evolved, particularly in the 1970's, we shifted our focus towards developing machinery for the emerging Glass Fibre Reinforced Concrete (GRC/GFRC) sector, which was then in its infancy. Since then, our commitment to innovation and quality has propelled us to become a global leader in GRC/GFRC production technologies.

Today, our equipment is trusted by manufacturers in over 100 countries worldwide.

We are ISO 90001 and ISO 45001 accredited.

**Majestic
Transformer Co.**

Majestic Transformer Company was established in 1942, emerging as a dedicated transformer specialist from a group of people doing repairs and service replacements for a wide range of radios, amplifiers and other domestic electrical equipment. From these humble beginnings, we have recently celebrated our 80th anniversary and are still going from strength to strength.

Starting out life as a rewinding house for service replacements we have transformed over the years into a leading manufacturer of new electrical transformers, chokes and associated power supplies, custom built to specification. So, if you are looking a simple isolation transformer or want a more complex unit then give us a call or drop us an Email.

Subcontract Precision Sheet Metal Work & Light Fabrications
Dynamic yet agile, we are a 5th generation family-owned Dorset UK company, established in Bridport in 1885. Today, as a result of our vigorous reinvestment programme, we fabricate utilising the very latest in sheet metal working machinery and Cad Cam simulation techniques.

Entrust Ackerman with your sheet metal fabrication needs; with minimal fuss we will meticulously engineer whilst keeping you fully informed. We take pride in building long-term business partnerships.

Our sub-contract precision sheet metal components and fabrications are used across the UK, throughout Europe and beyond. Customers include OEMs in fields such as electronics, security, transport, hydraulics, nuclear and plastics, along with medical, construction and many more.
